

Environmental Basic Policy

Basic Position Statement

We, Shimizu Corporation and Group Companies, will contribute to value creation and sustainable development of society by practicing "Business activities with less environmental load" and "Environmental creation and restoration" at each stage of Sales (business development), R&D (research & development), Design, Procurement, Construction, Renovation, and Demolition.

Guidelines on Conduct

1. Shimizu sets and works on the following related goals that will contribute to the achievement of the SDGs.
 1. Mitigating Global Warming (Ecological Mission)
 2. Resource Conservation and Resource Recycling
 3. Biodiversity Preservation
2. Shimizu implements the following measures that will contribute to the achievement of our goals.
 - Energy saving and conversion to renewable energy in life cycle of buildings
 - Reduction of waste such as waste plastic and promotion of effective use
 - Promotion of activities for biodiversity preservation and indexing
 - Technology research and development that contributes to solving environmental issues and strengthening business competitiveness
3. Shimizu complies with environmental laws and regulations through continuous improvement and utilization of our environmental management system in order to prevent pollution.
4. Shimizu contributes to value creation and social development through communication inside and outside the business, such as promoting the adoption of environmental technology through dialogue with customers, environmental volunteers and support activities.
5. Shimizu strives to raise environmental awareness and acquire knowledge through environmental education.
6. Recognizing this policy, Shimizu Group aim to minimize environmental-related business risks such as climate change and maximize opportunities.

April 1st 2025

Tatsuya Shimmura
