

Future we want to fully realize

# SHIMZ Beyond Zero 2050

## Shimizu's environmental vision will create abundance Beyond Zero

A positive world that achieve Beyond Zero—that is what we want to build for people living now, and the children who have right to thrive in future.

Providing positive environmental value to customers and society that extends beyond just a zero negative impact from the company's own business activities.

Shimizu group will create a wealth of environmental value through innovation approaching from the three perspectives of "zero – carbon society", a "resource recycling society", and a "society that coexists harmoniously with nature".

Today's Work, Tomorrow's Heritage

SHIMIZU CORPORATION supports the Sustainable Development Goals
